Menu Your Favorite Nostalgia Show is Over But Don't Worry You're Our Favorite Nostalgia Show Your Favorite Nostalgia Show Is Over But Don't Worry You're Our Favorite Nostalgia Show In case you were not listening to the radio every day, we wanted to assure you, your favorite radio show about the old days of Rock and Roll and your favorite songs, has officially come to an end. Well, as of today that is. However, we promised that you would get to listen to and read all the classics that you enjoyed every single week. That won't happen over the next few weeks but it will be available in the form of a book you can enjoy on your hand held device or as a digital download. To assist you in the transition, we wanted to offer you an alternative to all that we shared with you. So, in the hopes of never bringing you down, we provided you with a favorite song that's never been heard that you can enjoy. – See more at: Anderson is a very busy man. Evaluation of the efficacy of low-dose aqueous chlorhexidine irrigation in the management of chronic peri-implantitis. To evaluate the efficacy of a 2% chlorhexidine mouthrinse combined with irrigation of the peri-implant sulcus with a 0.2% aqueous chlorhexidine solution in the treatment of peri-implantitis lesions in patients with chronic marginal periodontitis. Twelve patients with peri-implantitis lesions were randomly divided into two treatment groups. One treatment group was irrigated daily for 4 weeks using a 0.2% aqueous chlorhexidine solution, while the other received saline irrigations. Submucosal biopsies were taken at baseline and week 4 for histologic evaluation. The mean reductions in probing depths from baseline to week 4 in the aqueous and saline groups were 2.17 +/- 0.77 mm and 0.83 +/- 0.93 mm, respectively, with a statistically significant difference between groups (P = .04). There was a statistically significant improvement in the mean radiographic bone levels from baseline to week 4 in both the chlorhexidine and saline groups (P .05). The use of a low-dose aqueous chlorhexidine solution following mechanical debridement in the treatment of peri-implantitis resulted in significantly 09e8f5149f
